Subject: 300 miner units to Granbury.

Dear Max,

Thanks so much for your new plan. That is better. I will notify Lax warehouse to send 200 miner to Humble,TX next week .Pls tell me the contact detail of your TX warehouse.

About the last 100 Miners, As the BTC price drop, I decided to stop the plan to relocate the M20/21 miners from China. We will upgrade Miners to M30s. We have already ordered for the M30S and usually there are some delivery delays for new machines. I will try my best to deliver to your factory on time. Thanks again!

Have a nice weekend!

David Zhang

Hi Laura and David,

As our the go-live date of our Minden facility is still TBD, we have made the decision to deploy all 300 of your units at our Granbury, TX facility so that there are no further delays. Please ship all 300 units to our warehouse in TX, where the units will then be routed to site for installation. Here is the address:

MVP
8411 Humble Westfield Road Suite 110
Humble, Texas 77338

Please let me know if you have any questions.

Thanks,

Max Niederluecke

Laura,

We are still waiting on the final go-live schedules for Minden, but there has been a slight delay and it is now looking like a potential August start date. This is smaller site than Granbury, so we do not need to receive the gear as far in advance.

Do you currently have 200 units ready for shipment to the TX warehouse?

Thanks,

Max Niederluecke

Dear Max and Taylor,

May I know if you can answer the following questions from David? Is there any change for NE site? Is it still start from 1 Jul,2022?

Please let us know, so we can arrange work accordingly.

Thank you!

Laura

Dear Taylor,

This arrangement is great, I can send it to Humble TX 77338.

But I also want to confirm that the NE site can start on time on July 1? Please understand that I would like to prioritize the delivery of Lax's inventory to the factory that starts first. According to your plan, the TX site will start on August 1st, and the NE site should start on July 1st. There is any change?

Tks & B.rgds!

David

David-

Since the Minden site is not set up yet, I would need your miners to be sent to our warehouse in Humble, TX. This was we can document the serial numbers in out inventory and keep them secure until deployment at Minden. You will not have to worry about shipping them from TX to Nebraska, as we will handle that. Let me know if you can set up delivery of these miners to this address:

MVP
8411 Humble Westfield Road Suite 110
Humble, Texas 77338

Hi Taylor,

Could you please confirm when can we deliver to NE station?

Have a nice weekend!

Dear Taylor,

Thanks so much for your support. Once confirmed by Minden site, we will arrange all miner in Lax to delivery. **But** I need more time to deal with the Shanghai problem, I will let you know asap.

Tks & B.Rgds !

David-

That is great to hear! Below is the site address for Minden, but I am not sure if they are ready to accept delivery yet. I am checking on that and will let you know.

**Site
Address**

1404 N Rd. Kearney
County
Minden, NE 68959

Let me know when the 90 Miners are expected to be delivered and I will get them on the schedule. Please also let me know once the remaining amount will be delivered from Shanghai.

Thanks
